

Preparation For Roach Treatment

The idea behind the prep work you will be doing is to eliminate all potential food sources for pests and to ensure their only option is to consume our baits. Proper sanitation is essential to the success of the treatment.

1. Please do a deep clean of the kitchen and bathrooms and the inside and outside of the dishwasher. This includes cleaning behind the stove and refrigerator (including all items on top of a refrigerator). Clean all grease off the stove and clean all countertops.
2. Do not have any clutter in the house. Remove items away from the baseboards.
3. Everything should be removed from kitchen cupboards and cupboards swept clean and wiped down with cleaner. Areas above and below the sink, drawers, and countertops should be cleaned. Items may be placed on the kitchen table or on a couch or chair and should be covered with newspaper or a sheet.
4. Garbage containers should be emptied daily. No open food or dirty dishes.
5. Pet food dishes should be put up during treatment and pet food should be kept in a tightly sealed container.
6. It may be necessary for you and your pets to vacate the property for 4 hours to allow products to dry.

Your full cooperation and adherence to the prep sheet is crucial to the success of the treatment. Any violation of the prep sheet could result in an unsuccessful treatment, or the need for additional treatments. The combination of your cooperation and the treatment program will result in the eradication of bed bugs.

I fully understand what is required of me and acknowledge that I have received the Bed Bug Prep Sheet.
